

111M

Computer Splicing Tape *Matte*

DESCRIPTION

The Decker 111M is a transparent polypropylene film tape coated with a solvent-based acrylic adhesive and matte finish. This product is custom slit with a perforation down the center of the roll.

FEATURE

- Applications: splicing for all continuous forms or perforated labels
- Continuous perforation is in the machine direction, allowing for tape to bend with perforation or fanfold splice
- Product is applied as a splice between the two forms and the perforation allows for easy separation
- High tack, high adhesion and long lasting without yellowing
- Hand-tearable, non-glare
- Matte finish can be written on

TECHNICAL DATA (Average Values)
